Your Health Idaho Enrollment Entity Q&A

1. The RFA is a little different from what I've seen before. I've looked through the document provided and the RFA checklist and I could use some guidance! For the RFA, do you want typical grant narratives such as the organization description and history, proposed project/activities, proposed evaluation plan, budget, timeline, etc.? Or is this just a basic screening and all of that information comes later?
 - We don't require information over and above what's requested in the "Applicant Information Sheet" and Exhibit A / Part 1 of the application.
2. Can you describe what typical Enrollment Entity activities are?
 - There is some information in Part IV of the application. In the most basic form, Enrollment Entities will:
 - Become certified during our Annual Consumer Connectors Certification processes
 - Provide education and / or assistance to consumers on the process to create an account with YHI and apply for APTC
 - Enrollment Entities will not provide guidance to consumers needing assistance with the selection of health plans
 - See Part IV of the RFA for more details
3. Can you describe what typical performance metrics and reporting looks like?
 - A sample of the report Enrollment Entities are expected to submit on a monthly basis is attached.
